

Joining a satellite radio service has been one of the best investments that I have ever made. The programming variety and the sound quality are enough to justify my purchase, and the availability of local services such as traffic and weather reporting is invaluable to me as a commuter. I don't believe that the NAB should have the right to restrict the information provided to satellite radio subscribers- after all, I pay to get that type of service! The local traffic and weather offered by competing broadcasters has been sub-par for many years and it is deeply disheartening to see that any improvements offered to the public through satellite radio are being threatened by corporate interests. I ask you to consider the incredible benefit that satellite radio offers its subscribers and to reject the NAB petition 04-160, so that consumers like myself can receive the services they deserve.
